

ANDRÉ RODRIGUES

WEB DEVELOPER

PROFILE

A motivated and people's person web developer eager to help establish quick and long-lasting solutions, relationships, and assist in developing and implementing high-quality products.

RECENT EXPERIENCE

Web Developer

APR 2023 - NOV 2023

Paytrix

- Developed key features, implemented Cypress integration tests to enhance the release cycle and developer productivity, and took ownership of resolving flaky tests, which led to a substantial increase in the reliability of our test suite and the overall stability of our CI pipeline;
- Actively involved in building the foundations of coding standards documentation, code refactoring, and bolstering test suite stability, directly improving code quality and system resilience, saving significant amounts of time and company resources;
- Developed automation tools that significantly increased developer productivity by simplifying project setups and financial data generation, such as IBANs and other financial information;
- Ownership of leadership tasks which included synchronizing product, design, and development efforts, filling important gaps in communication, and reviewing Product Requirements Documents (PRDs) creating and estimating tasks, ensuring alignment with project goals and timelines.

Web Developer

JUN 2022 - APR 2023

Pipedrive

- Expertly leveraged microservices and event-driven architecture to improve and maintain a robust automation feature that played a significant role in revenue growth;
- Employed advanced technology stacks including React, TypeScript, Node, Docker, React Testing Library, and Cypress, leading to substantial improvements in code quality and reliability through comprehensive testing;
- Engaged in hackathons and strategic team missions alongside partners, directly contributing to the ideation and development of key features that secured a significant competitive edge in the market.

SKILLS

- Javascript, React, Redux, Next.js
- Typescript, React Native, jQuery
- HTML5, CSS3, SASS
- Cypress, React Testing Library, Jest
- Node, Docker, Python, Git, OOP
- Figma, Sketch, Affinity

MAIN EDUCATION

FreeCodeCamp

- Front-End Development Libraries
- Algorithms and Data Structures
- Responsive Web Design
- Back End Development and APIs

Design

- UX/UI Fundamentals Certification
- Mobile UX/UI Certification

Certifications

- Mastering React
- Javascript Mastery Series
- Data Structures & Algorithms Series
- Design Patterns Series
- The Ultimate Redux Course
- The Complete Node.js Course
- The Complete Typescript Course
- The Complete Docker Course

ANDRÉ RODRIGUES

WEB DEVELOPER
FRONT-END & UX/UI DESIGN

Front-end Developer

FEB 2022 - JUN 2022

Sky

- Developed and maintained a scalable global platform called Peacock, widely used by people globally with millions of views monthly, tailoring client-focused solutions to meet diverse business requirements.
- Oversaw the entire development process, actively engaging in product design discussions, code writing, and review, ensuring high-quality outputs and strategically aligning development efforts with business objectives.
- Championed product quality, security, and performance enhancements, significantly impacting the team and broader organizational goals with focused improvements.

Lead Front-end Developer

JUN 2021 - JAN 2022

Wise Sparrow

- Led front-end development, incorporating JavaScript technologies to facilitate an early launch of the online lottery platform;
- Drafted Product Requirements Documents and engaged in key partner meetings, focusing on clear communication and stakeholder alignment;
- Demonstrated features of the online lottery platform, ensuring that key functionalities were effectively communicated to partners;
- Coordinated with a team of three developers, providing guidance and support to maintain project momentum and meet early delivery targets;
- Focused on proactive problem-solving and responsible leadership, contributing to the company's enhanced market position.

Front-end Developer

JAN 2021 - JUL 2021

Wise Sparrow

- Led the complete process of designing, prototyping, and implementing an online lottery platform called Lotto Jade using Sketch, focusing on intuitive user experience and high engagement while ensuring technical feasibility and adherence to brand standards.
- Developed and optimized the project with React, enhanced website functionality and user interaction with A/B testing, and implemented performance, integration, and unit testing with React Testing Library to boost code quality and reliability.
- Advanced the front-end architecture, promoting efficiency and sustainability in line with business needs, and embraced a responsive, mobile-first approach for standardizing outputs in line with the latest web design and UX/UI practices.
